

Jitterbit Core Training

Accelerate your integration success with Jitterbit Core training

Jitterbit Core Training

Jitterbit Core is the next step for learners that have completed Jitterbit Foundations and have a firm understanding of the Harmony Platform and Jitterbit Studio.

Jitterbit Core is a lecture-style course containing videos and quizzes to reinforce the principals discussed in each module. It dives deeper and discusses project variables, scripting, and instance mappings as well as best practices around schedules, environments, and error handling.

KEY BENEFITS

- ✓ On-demand, self-paced training allows you to learn when and where you want
- ✓ Learn to create and manage successful integration projects
- ✓ Understand best practices for optimized workflows
- ✓ Develop data integration skills using a standards-based platform
- ✓ Leverage templates for future projects

Contact your Customer Success Manager today to set up training for your organization.
